Mississippi State Department of Health

The Mississippi State Department of Health's mission is to promote and protect the health of the citizens of Mississippi. Through the work of public health team members across the state, the Mississippi State Department of Health aims to assist every community in the state to achieve the best possible health status for its citizens. Mississippi's public health system included the State Board of Health, a State Health Officer, and programmatic/administrative personnel at the central office in Jackson, nine Public Health District offices, and 81 County Health Departments.

Foreword

The public perceives (and the media sometimes portrays) injuries as “accidents” caused by chance or carelessness, rather than as preventable events. Approximately 680 of Mississippi’s children and adolescents under the age of 25 die annually as the result of intentional or unintentional injury. For every child that dies from injury, it is estimated that 45 more children are admitted to a hospital for treatment and 1,300 more are treated in an emergency department.

Mississippi has the highest rates of injury mortality in the Southeastern Region of the United States for children and adolescents age 1 to 24 years. Injuries caused 3,159 (49.2%) of the 6,420 fatalities among Mississippi’s children and adolescents aged 24 and younger from 1993–1997. The injury fatality rate was 59.8 per 100,000 children and adolescents. The estimated cost totaled nearly \$2.6 billion and accounted for over 190,000 years of potential life lost. These tragedies need not have happened at all. With injury, there is an immediate connection between prevention and outcome. Many injuries can be prevented entirely, or certainly their severity can be diminished.

This publication, *Mississippi Databook of Child and Adolescent Fatal Injury by Public Health District, 1993–1997*, portrays how injury fatalities affect children and youth in Mississippi and in each of our nine Public Health Districts. It can be used to track our progress towards the Healthy People 2000 Objectives and help build an awareness to make Mississippi a safer state for our children.

The Mississippi Child and Adolescent Fatal Injury Database

The injury data included in the body of this report were prepared by the Mississippi State Department of Health, Office of Community Health Service's, Bureau of Public Health Statistics using the *Fatal Injury Matrix*, a spreadsheet program designed to assist state and local injury prevention programs with the calculation and analysis of injury statistics. All data are based on vital statistics death records. The purpose of this document is to provide a detailed description of fatal injuries among children and adolescents (ages 0-24 years) between 1993 and 1997 in Mississippi and the nine Public Health Districts.

The *Fatal Injury Matrix* calculates mortality rates for each age group by type of injury. However, it is important to note that the National Center for Health Statistics (NCHS) considers rates based on 20 or fewer deaths to be statistically unreliable and to be regarded with caution. For more information, see *Advance Report of Final Mortality Statistics*, 1990 (Vol. 41, No. 7, Supplement: January 7, 1993). A copy of this report can be obtained by calling (301) 436-8500. Five years of data were utilized in an attempt to address the issue of small numbers.

Why Injury Data are Important

Injury is one of the most serious social, economic and medical problems of our time. It is the leading cause of death among children in the United States, with more children and adolescents dying as a result of injury than for all other causes combined. Injuries also result in lifelong disabilities. For every injury death, there are an estimated 45 hospitalizations and 1,300 emergency room visits. The real tragedy is that most childhood injury can be prevented through the use of existing technology and environmental changes. Injury data are essential for the development of appropriate injury prevention programs. Injuries, like infectious diseases, do not happen accidentally. They follow a pattern. The ground work in identifying that pattern begins with surveillance to find out what injuries are occurring, where and when they occur, and to whom. Information collected on injuries should include variables such as age, race, type, and cause of injury. This level of detail can help identify populations at risk for specific injuries and help focus injury prevention efforts. The *Fatal Injury Matrix* divides injury into two groups: intentional injury in which there was a known intent to do harm (such as with homicide or suicide) and unintentional injury in which there was no known harmful intent. This distinction can be useful when designing injury prevention programs.

Healthy People 2000 Objectives

Healthy People 2000 is the Public Health Service (PHS) national initiative to improve the health of all Americans through a coordinated and comprehensive emphasis on prevention. This initiative contains objectives that specifically address both intentional and unintentional injuries. In this report, the last page of each data section lists the objectives, targets and district or state rates that could be calculated from the data gathered using the *Fatal Injury Matrix*. These district and state rates provide an assessment of injury for comparison with the national Healthy People 2000 baselines and targets.

Fatal Injury in Mississippi

In Mississippi, 3,159 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. Estimated costs totaled nearly \$2.6 billion and 190,127 years of potential life lost. Mississippi had the highest rates of injury death in the southeast region for all age groups except for children younger than one year in which the Mississippi rate was second highest.

Injury Fatality Rates (per 100,000) by District and Age Group

As displayed in the table, the population with the highest fatality rates were the 20-24 year olds. Children less than one year of age had higher fatality rates than preschool or school aged children. District VI had the highest rates of injury mortality in Mississippi for children 14 years and younger.

Five Leading Causes of Fatal Injury in Mississippi's Public Health Districts by Age

| | Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |

(Abbreviations: MV= Motor Vehicle, Unintent = Unintentional)

* More than one injury category with the same number of deaths

** No deaths recorded

SUMMARY

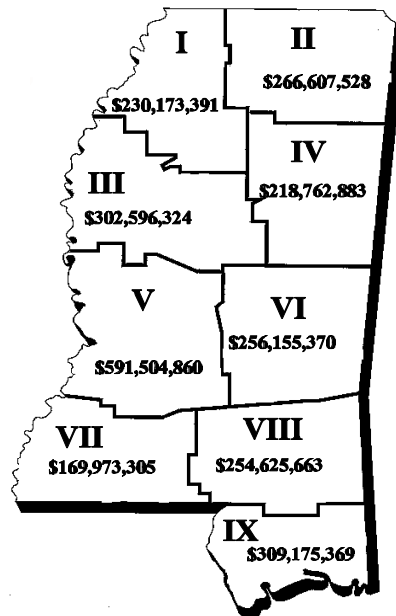

The following table is a summary of each District's number of fatal injuries, estimated costs, years of potential life lost, fatal injury rate and overall rank in the rate of injury death among children and adolescents in Mississippi from 1993-1997.

| | 1993-1997 Average Population | Total Number of Fatal Injuries | Fatal Injury Rate | Rank | Years of Potential Life Lost | Total Estimated Cost of Injury* |
|---|------------------------------------|--------------------------------------|-------------------------|------|---------------------------------|------------------------------------|
| MS | 1,055,895 | 3,159 | 59.8 | | 190,127 | \$2,599,574,693 |
| District I | 95,296 | 280 | 58.8 | 5 | 16,762 | \$230,173,391 |
| District II | 115,631 | 318 | 55.0 | 7 | 19,081 | \$266,607,528 |
| District III | 108,479 | 369 | 68.0 | 2 | 22,016 | \$302,596,324 |
| District IV | 99,413 | 265 | 53.3 | 8 | 16,011 | \$218,762,883 |
| District V | 220,369 | 724 | 65.7 | 3 | 43,425 | \$591,504,860 |
| District VI | 87,624 | 313 | 71.4 | 1 | 19,208 | \$256,155,370 |
| District VII | 65,131 | 204 | 62.6 | 4 | 12,186 | \$169,973,305 |
| District VIII | 106,612 | 307 | 57.6 | 6 | 18,449 | \$254,625,663 |
| District IX | 157,339 | 379 | 48.2 | 9 | 22,987 | \$309,175,369 |
| *Description included in the methodology section on page 106. | | | | | | |

Fatal Injury Rate per 100,000
by Public Health District

Estimated Cost of Injury
by Public Health District

Death Rates (per 100,000) by Leading Causes of Fatal Injury in Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| | | |
|-------------------------------------|---------------------------------------|------------------------|
| Abbreviations: Suffoc = Suffocation | MV-Occ = MV Occupant | MV-Ped = MV Pedestrian |
| Oth Trans = Other Transport | Unint Firearm = Unintentional Firearm | |

Note: The Y-axis shows the death rate per 100,000. The scale for this axis is not identical for all age groups as some of the axes have been changed to allow for maximum detail.

Percentage of Injury and Population by District

The table below shows each District's percentage of the state's population for children and adolescents ages 0-24 years and the state's percentage of all unintentional and intentional injury for the same ages during the 1993-1997 time period. If injury occurred with equal frequency throughout Mississippi, the percentage of injury for each District would equal the percentage of the state's population.

The table shows that only District IX had less than the expected intentional and unintentional injury deaths based on their percent of population. Four Districts (I, II, IV and VIII) had less than the expected percent of intentional injury but about the expected percent of unintentional injury. District VI and District VII had more than the expected percent of unintentional injury while District VII had less than the expected percent of intentional injury and District VI had about the expected percent of intentional injury. District V had less than the expected percent unintentional injury but more than the expected percent intentional injury. District III had more than the expected percent of intentional injury but had about the expected percent of unintentional injury based on its percent of the population.

| | District I | District II | District III | District IV | District V | District VI | District VII | District VIII | District IX |
|------------------------|------------|-------------|--------------|-------------|------------|-------------|--------------|---------------|-------------|
| % Population | 9.0% | 11.0% | 10.3% | 9.4% | 20.9% | 8.3% | 6.2% | 10.1% | 14.9% |
| % Unintentional Injury | 9.6% | 11.7% | 10.4% | 9.5% | 19.1% | 10.6% | 7.0% | 10.2% | 12.1% |
| % Intentional Injury | 7.4% | 6.8% | 14.4% | 6.2% | 30.7% | 8.6% | 5.4% | 8.8% | 11.9% |

Healthy People 2000 Rates in Mississippi

The following pages contain specific information on the incidents, rates and costs of injury by District. All information was gathered by using the comparable injury definitions and sources as listed in the Appendices.

The last page of this section for Mississippi (page 14) lists the Healthy People 2000 target rates and the Mississippi rates that could be calculated from the data. Mississippi had injury fatality rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the homicide rate and drowning fatality rate among young children, and the suicide rate for youth aged 15-19 years exceeded the Healthy People Year 2000 target rates. The motor vehicle fatality rate for both children aged 14 years and younger and for youth aged 15-24 was more than twice the target rate. For children aged 4 years and younger, the rate of residential fire death is more than two times the Year 2000 target rates.

| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 51.8 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 3.2 |
| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 8.6 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District I

In District I, 280 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$230 million and accounted for 16,762 years of potential life lost. District I ranked fifth in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 78% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for youth aged 10-24 and accounted for 34% of all child and adolescent injury deaths.

The leading causes of fatal injury in District I are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|---|--|--|---|---|
| Suffocation 43% (3) | Fire/Flames 54% (14) | Other Unintentional 50% (2) | Motor Vehicle Occupant 19% (4) | Motor Vehicle Occupant 43% (45) | Motor Vehicle Occupant 32% (36) |
| Motor Vehicle Occupant 28% (2) | Drowning 15% (4) | Motor Vehicle Occupant 25% (2) | Homicide 19% (4) | Homicide 18% (19) | Homicide 25% (28) |
| Other Unintentional 28% (2) | Homicide 11% (3) | Drowning 12% (1) | Drowning 14% (3) | Other Transport 12% (13) | Other Transport 16% (18) |
| ** | Motor Vehicle Occupant 8% (2) | Other Transport 12% (1) | Three Causes at 9% (2) each | Unintentional Firearm 11% (9) | Suicide 12% (14) |
| ** | Motor Vehicle Pedestrian 8% (2) | ** | ** | Suicide 8% (8) | Two Causes at 3% (4) each |
| ** No cases reported | | | | | |

Healthy People 2000 Rates in District I

The last page of this section lists the selected Healthy People 2000 target rates and District I's fatality rates that could be calculated from Mississippi's mortality data. District I had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the motor vehicle fatality rate for children 14 years and younger exceeded the target rates. The motor vehicle fatality rate for youth aged 15-24 was more than twice the target rate. For children aged 4 years and younger, the rate of residential fire death was more than four times the Year 2000 target rates.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District I Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 14.5 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District II

In District II, 318 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$266 million and accounted for 19,081 years of potential life lost. District II ranked seventh in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among children less than one year of age and youth aged 15-24 years, in which 81% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for children and youth aged 5-24, and were one of the leading causes in children aged 1-4 years and accounted for 43% of all child and adolescent injury deaths.

The leading causes of fatal injury in District II are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--|--|---|---|
| Motor Vehicle Occupant 58% (7) | Fire/Flames 25% (6) | Motor Vehicle Occupant 40% (6) | Motor Vehicle Occupant 30% (6) | Motor Vehicle Occupant 49% (60) | Motor Vehicle Occupant 47% (59) |
| Suffocation 17% (2) | Motor Vehicle Occupant 25% (6) | Fire/Flames 20% (3) | Drowning 15% (3) | Other Transport 11% (14) | Suicide 16% (20) |
| Homicide 8% (1) | Homicide 21% (5) | Four Causes at 7% (1) each | Suicide 15% (3) | Homicide 10% (13) | Other Transport 12% (12) |
| Fire/Flames 8% (1) | Other Transport 12% (3) | ** | Three Causes at 10% (2) each | Suicide 10% (12) | Homicide 11% (14) |
| Other Transport 8% (1) | Four Causes at 4% (1) | ** | ** | Unintentional Firearm 7% (7) | Drowning 3% (4) |
| ** No cases reported | | | | | |

Healthy People 2000 Rates in District II

The last page of this section lists the selected Healthy People 2000 target rates and District II's fatality rates that could be calculated from Mississippi's mortality data. District II had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the homicide rate for children aged 4 and younger and the suicide rate for youths aged 15-19 exceeded the target rates. The motor vehicle fatality rate for children aged 14 and younger and for youth aged 15-24 was more than twice the target rate. For children aged 4 years and younger, the rate of residential fire death was twice the Year 2000 target rates. There were no drowning fatalities to children aged four and younger.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District II Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| Chapter 9. Unintentional Injury | | | | |
| 9.3a Motor vehicle fatalities children aged 14 and younger | 6.2 | 6.2 | 4.4 | 10.9 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 59.6 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 0.0 |
| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 6.6 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District III

In District III, 369 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$302 million and accounted for 22,016 years of potential life lost. District III ranked second in rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 78% of the injury deaths occurred. Homicide's were the leading cause of injury death for youth aged 20-24 and accounted for 21% of all child and adolescent injury deaths.

The leading causes of fatal injury in District I are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--------------------------------------|--|---|---|
| Motor Vehicle Occupant 31% (4) | Fire/Flames 37% (9) | Six Causes at 12% (2) each | Motor Vehicle Occupant 21% (6) | Motor Vehicle Occupant 33% (43) | Homicide 48% (76) |
| Suffocation 23% (3) | Motor Vehicle Occupant 15% (4) | ** | Homicide 21% (6) | Homicide 26% (34) | Motor Vehicle Occupant 29% (46) |
| Homicide 15% (2) | Drowning 12% (3) | ** | Unintentional Firearm 21% (6) | Suicide 13% (17) | Suicide 6% (9) |
| Fire/Flames 15% (2) | Motor Vehicle Pedestrian 12% (3) | ** | Other Transport 14% (4) | Other Transport 8% (12) | Other Transport 5% (8) |
| Two Causes at 8% (1) each | Homicide 8% (2) | ** | Two Causes at 7% (2) each | Unintentional Firearm 8% (10) | Unintentional Firearm 3% (5) |
| ** No cases reported | | | | | |

Healthy People 2000 Rates in District III

The last page of this section lists the selected Healthy People 2000 target rates and District III's fatality rates that could be calculated from Mississippi's mortality data. District III had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the homicide rate among young children under 4 years and drowning fatalities for children aged 4 and younger exceeded the Healthy People 2000 target rates. The motor vehicle fatality rate for children and youth aged 24 years and younger, as well as, the suicide rate for youth aged 15-19 years was almost twice the target rates. For children aged 4 years and younger, the rate of residential fire death was more than three times the target rates.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District III Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| | | |

| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 10.5 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District IV

In District IV, 265 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled nearly \$219 million and accounted for 16,011 years of potential life lost. District IV ranked eighth in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 72% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for children age 1-4 and youth aged 10-24 and accounted for 37% of all child and adolescent injury deaths.

The leading causes of fatal injury in District IV are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--|--|---|---|
| Suffocation 57% (4) | Motor Vehicle Occupant 32% (8) | Fire/Flames 37% (6) | Motor Vehicle Occupant 24% (6) | Motor Vehicle Occupant 48% (44) | Motor Vehicle Occupant 39% (39) |
| Motor Vehicle Occupant 14% (1) | Fire/Flames 29% (7) | Other Transport 19% (3) | Fire/Flames 20% (5) | Homicide 17% (16) | Homicide 18% (18) |
| Motor Vehicle Pedestrian 14% (1) | Suffocation 8% (2) | Drowning 12% (2) | Suicide 16% (4) | Suicide 8% (7) | Suicide 16% (16) |
| Fire/Flames 14% (1) | Drowning 8% (2) | Motor Vehicle Pedestrian 12% (2) | Drowning 12% (3) | Three Causes at 5% (5) each | Three Causes at 4% (4) each |
| ** | Three Causes at 4% (1) each | ** | Unintentional Firearm 12% (3) | ** | ** |
| ** No cases reported | | | | | |

Healthy People 2000 Rates in District IV

The last page of this section lists the selected Healthy People 2000 target rates and District IV's fatality rates that could be calculated from Mississippi's mortality data. District IV had several injury rates that were below the Healthy People 2000 target rates during 1993-1997. Specifically, the homicide rate for young children and the suicide rate for youth age 15-19 years, as well as, the drowning fatality rate for children aged 4 and younger were all below the target rates. However, the motor vehicle fatality rate for children aged 14 years and younger and the fire death rate for children aged 4 and younger were more than twice the target rates. For youth aged 15-24 years, the rate of motor vehicle fatalities was almost twice the Year 2000 target rate.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District IV Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

SELECTED HEALTHY PEOPLE 2000 OBJECTIVES: DISTRICT IV

| Chapter 7. Violent and Abusive Behavior | 1987 Baseline | Revised Baseline | Revised Target | Local Current Rate |
|--|---------------|------------------|----------------|-------------------------------|
| 7.1a Homicide rate for children under 4 years | 3.9 | 3.9 | 3.1 | 1.1 Rate includes 4-year olds |
| 7.2a Suicide rate for youths aged 15-19 | 10.3 | 10.3 | 8.2 | 6.6 |
| Chapter 9. Unintentional Injury | | | | |
| 9.3a Motor vehicle fatalities children aged 14 and younger | 6.2 | 6.2 | 4.4 | 9.4 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 46.5 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 2.2 |
| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 8.6 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District V

In District V, 724 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$591 million and accounted for 43,425 years of potential life lost. District V ranked third in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 78% of the injury deaths occurred. Homicide was the leading cause of injury death for youth aged 15-24 and accounted for 30% of all child and adolescent injury deaths.

The leading causes of fatal injury in District V are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|---|--|--|---|---|
| Suffocation 31% (8) | Fire/Flames 32% (20) | Motor Vehicle Occupant 28% (10) | Motor Vehicle Occupant 17% (6) | Homicide 35% (92) | Homicide 41% (123) |
| Homicide 27% (7) | Homicide 19% (12) | Fire/Flames 17% (6) | Homicide 14% (5) | Motor Vehicle Occupant 32% (83) | Motor Vehicle Occupant 30% (91) |
| Fire/Flames 23% (6) | Motor Vehicle Pedestrian 16% (10) | Drowning 17% (6) | Drowning 14% (5) | Suicide 14% (37) | Suicide 12% (37) |
| Motor Vehicle Occupant 15% (4) | Motor Vehicle Occupant 14% (9) | Motor Vehicle Pedestrian 11% (4) | Unintentional Firearm 14% (5) | Unintentional Firearm 5% (13) | Other Transport 3% (10) |
| Other Transport 4% (1) | Suffocation 8% (5) | Homicide 11% (4) | Fire/Flames 11% (4) | Other Transport 4% (10) | Motor Vehicle Motorcycle 3% (8) |

Healthy People 2000 Rates in District V

The last page of this section lists the selected Healthy People 2000 target rates and District V's fatality rates that could be calculated from Mississippi's mortality data. District V had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the suicide rate for youth aged 15-19 years and the motor vehicle fatality rates for both children aged 14 years and younger and for youth aged 15-24 were nearly twice the target rate. For children aged 4 years and younger, the rate of residential fire death was more than three times the Year 2000 target rates. The homicide rate among young children was also nearly three times the target rate. However, the drowning rate among young children was well below the Year 2000 target rate.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District V Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| 9.3a Motor vehicle fatalities children aged 14 and you | 6.2 | 6.2 | 4.4 | 8.2 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 46.7 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 1.4 |
| 9.6a Residential fire deaths children aged 4 and young | 4.4 | 4.5 | 3.3 | 12.0 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District VI

In District VI, 313 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$256 million and accounted for 19,208 years of potential life lost. District VI ranked first in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among children aged 1-4 years and youth aged 15-24 years, in which 80% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for children aged four years and younger and youth aged 10-24 and accounted for 33% of all child and adolescent injury deaths.

The leading causes of fatal injury in District VI are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--|--|---|---|
| Motor Vehicle Occupant 60% (8) | Motor Vehicle Occupant 30% (13) | Drowning 23% (4) | Motor Vehicle Occupant 22% (7) | Motor Vehicle Occupant 45% (46) | Motor Vehicle Occupant 42% (45) |
| Suffocation 17% (2) | Motor Vehicle Pedestrian 14% (6) | Motor Vehicle Pedestrian 18% (3) | Homicide 22% (7) | Homicide 19% (19) | Homicide 27% (29) |
| Drowning 17% (2) | Fire/Flames 12% (5) | Four Causes at 12% (2) each | Other Transport 9% (3) | Suicide 12% (12) | Suicide 14% (15) |
| ** | Other Transport 12% (5) | Two Causes at 6% (1) each | Three Causes at 9% (3) each | Drowning 7% (7) | Drowning 5% (5) |
| ** | Drowning 9% (4) | ** | Two Causes at 6% (2) each | Other Transport 5% (5) | Fire/Flames 3% (3) |
| ** No Cases Reported | | | | | |

Healthy People 2000 Rates in District VI

The last page of this section lists the selected Healthy People 2000 target rates and District VI's fatality rates that could be calculated from Mississippi's mortality data. District VI had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, for children aged 4 and younger the homicide rate and fire death rate, as well as, the suicide rate for youth aged 15-19 years exceeded the target rates. The motor vehicle fatality rate for children 14 years and younger, was more than four times the target rate. The drowning fatality rate for children aged 4 years and younger was more than three times the target rate, while the motor vehicle fatality rate for youth aged 15-24 was more than twice the Year 2000 target rate.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District VI Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| Chapter 7. Violent and Abusive Behavior | 1987 Baseline | Revised Baseline | Revised Target | Local Current Rate |
|---|---------------|------------------|----------------|-------------------------------|
| 7.1a Homicide rate for children under 4 years | 3.9 | 3.9 | 3.1 | 3.6 Rate includes 4-year olds |
| 7.2a Suicide rate for youths aged 15-19 | 10.3 | 10.3 | 8.2 | 12.6 |
| Chapter 9. Unintentional Injury | | | | |
| 9.3a Motor vehicle fatalities children aged 14 and youn | 6.2 | 6.2 | 4.4 | 20.0 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 59.6 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 7.1 |
| 9.6a Residential fire deaths children aged 4 and younge | 4.4 | 4.5 | 3.3 | 5.9 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data

Fatal Injury in District VII

In District VII, 204 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled nearly \$170 million and accounted for 12,186 years of potential life lost. District VII ranked fourth in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 76% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause, or tied for the leading cause in all age groups and accounted for 40% of all child and adolescent injury deaths.

The leading causes of fatal injury in District VII are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|---|--|---|---|
| Other Transport 20% (1) | Fire/Flames 19% (3) | Motor Vehicle Occupant 14% (1) | Motor Vehicle Occupant 33% (7) | Motor Vehicle Occupant 48% (33) | Motor Vehicle Occupant 43% (36) |
| Motor Vehicle Occupant 20% (1) | Motor Vehicle Occupant 19% (3) | Other Transport 14% (1) | Suicide 14% (3) | Homicide 15% (14) | Homicide 21% (18) |
| Homicide 20% (1) | Drowning 19% (3) | Fire/Flames 14% (1) | Homicide 9% (2) | Suicide 12% (8) | Suicide 9% (8) |
| Fire/Flames 20% (1) | Scalds/Hot Objects 12% (2) | Motor Vehicle Pedal cycle 14% (1) | Drowning 9% (2) | Other Transport 7% (5) | Unintentional Firearm 7% (6) |
| Other Unintentional 20% (1) | Suffocation 12% (2) | Suicide 14% (1) | Other Transport 9% (2) | Unintentional Firearm 4% (3) | Two Causes at 6% (5) each |

Healthy People 2000 Rates in District VII

The last page of this section lists the selected Healthy People 2000 target rates and District VII's fatality rates that could be calculated from Mississippi's mortality data. District VII had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the suicide rate for youths aged 15-19 and the homicide rate for children aged four and younger exceeded the target rate. The motor vehicle fatality rate for children and adolescents aged 24 years and younger was more than twice the target rate. For children aged 4 years and younger, the rate of residential fire deaths and drowning fatalities were twice the Year 2000 target rate.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District VII Compared to Mississippi by Age Group, 1993 – 1997

<1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 6.5 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District VIII

In District VIII, 307 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled nearly \$255 million and accounted for 18,449 years of potential life lost. District VIII ranked sixth in the rate of injury death in the state for all age groups included in this analysis. The injury death rates were particularly high among youth aged 15-24 years, in which 76% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for children and youth aged 5-19 and accounted for 23% of all child and adolescent injury deaths.

The leading causes of fatal injury in District I are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--|--|---|---|
| Homicide 37% (3) | Fire/Flames 27% (8) | Motor Vehicle Occupant 22% (2) | Motor Vehicle Occupant 26% (7) | Motor Vehicle Occupant 54% (62) | Homicide 35% (42) |
| Suffocation 25% (2) | Motor Vehicle Occupant 20% (6) | Other Transport 22% (2) | Homicide 18% (5) | Other Transport 10% (12) | Motor Vehicle Occupant 31% (37) |
| Motor Vehicle Occupant 12% (1) | Homicide 13% (4) | Five Causes at 11% (1) each | Drowning 15% (4) | Homicide 10% (11) | Suicide 14% (17) |
| Falls 12% (1) | Drowning 10% (3) | ** | Unintentional Firearm 15% (4) | Suicide 7% (8) | Drowning 6% (7) |
| Other Unintentional 12% (1) | Two Causes at 7% (2) each | ** | Motor Vehicle Pedestrian 11% (3) | Motor Vehicle Pedestrian 4% (5) | Other Transport 3% (17) |
| ** No Cases Reported | | | | | |

Healthy People 2000 Rates in District VIII

The last page of this section lists the selected Healthy People 2000 target rates and District VIII's fatality rates that could be calculated from Mississippi's mortality data. District VIII had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the drowning rate among young children exceeded the target rate. The motor vehicle fatality rates for children aged 14 years and younger and for youth aged 15-24 were twice the target rates. For children aged 4 years and younger, the rate of residential fire deaths and the homicide rate were also more than twice the target rates. However, the suicide rate for youth aged 15-19 was below the target rate.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District VIII Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

| | | |
|-------------------------------------|----------------------|------------------------|
| Abbreviations: Suffoc = Suffocation | MV-Occ = MV Occupant | MV-Ped = MV Pedestrian |
| Oth Tran = Other Transport | Hom = Homicide | |

Note: The Y-axis shows the death rate per 100,000. The scale for this axis is not identical for all age groups as some of the axes have been changed to allow for maximum detail.

SELECTED HEALTHY PEOPLE 2000 OBJECTIVES: DISTRICT VIII

| Chapter 7. Violent and Abusive Behavior | 1987 Baseline | Revised Baseline | Revised Target | Local Current Rate |
|--|---------------|------------------|----------------|-------------------------------|
| 7.1a Homicide rate for children under 4 years | 3.9 | 3.9 | 3.1 | 7.1 Rate includes 4-year olds |
| 7.2a Suicide rate for youths aged 15-19 | 10.3 | 10.3 | 8.2 | 7.1 |
| Chapter 9. Unintentional Injury | | | | |
| 9.3a Motor vehicle fatalities children aged 14 and young | 6.2 | 6.2 | 4.4 | 8.9 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 53.5 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 3.0 |
| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 8.1 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

Fatal Injury in District IX

In District IX, 379 children and adolescents under the age of 25 were killed as a result of injury between 1993 and 1997. The estimated costs totaled over \$309 million and accounted for 22,987 years of potential life lost. District IX ranked ninth in the rate of injury death in the state for all age groups included in this analysis. The injury death rate was particularly high among youth aged 15-24 years, in which 88% of the injury deaths occurred. Motor vehicle occupant fatalities were the leading cause of injury death for children aged 1-4 and for youth aged 10-24 and accounted for 39% of all child and adolescent injury deaths.

The leading causes of fatal injury in District IX are listed by age group in the table below. The frequency of each injury is given in parentheses. Percentages identify the proportion of the total fatal injury within each age group that can be attributed to each injury type. Some percentages total to less than 100 because only the leading causes are listed

| Age <1 | Age 1-4 | Age 5-9 | Age 10- 14 | Age 15-19 | Age 20-24 |
|--|--|--|--|---|---|
| Suffocation 58% (11) | Motor Vehicle Occupant 22% (8) | Drowning 35% (8) | Motor Vehicle Occupant 30% (9) | Motor Vehicle Occupant 44% (53) | Motor Vehicle Occupant 33% (50) |
| Motor Vehicle Occupant 21% (4) | Drowning 22% (8) | Motor Vehicle Pedestrian 17% (4) | Suicide 17% (5) | Homicide 19% (23) | Homicide 23% (35) |
| Homicide 10% (2) | Homicide 19% (7) | Three Causes at 5% (2) each | Homicide 13% (4) | Suicide 14% (17) | Suicide 19% (29) |
| Fire/Flames 5% (1) | Fire/Flames 11% (4) | Five Causes at 4% (1) each | Other Transport 10% (3) | Other Transport 7% (9) | Other Transport 11% (17) |
| Other Unintentional 5% (1) | Three Causes at 5% (2) each | ** | Four Causes at 7% (2) each | Drowning 6% (7) | Drowning 5% (7) |
| ** No Cases Reported | | | | | |

Healthy People 2000 Rates in District IX

The last page of this section lists the selected Healthy People 2000 target rates and District I's fatality rates that could be calculated from Mississippi's mortality data. District IX had injury rates that exceeded the Healthy People 2000 target rates during 1993-1997. Specifically, the suicide rate for youth aged 15-19 and the motor vehicle fatality rate for youth aged 15-24 exceeded the Healthy People Year 2000 target rates. The homicide rate among young children and the motor vehicle fatality rate for children aged 14 and younger were nearly twice the target rates. The drowning fatality rate among young children was more than twice the target rate, while for children aged 4 years and younger, the rate of residential fire deaths was below the Year 2000 target rates.

Death Rates (per 100,000) by Leading Causes of Fatal Injury in District IX Compared to Mississippi by Age Group, 1993 – 1997

< 1 year olds

10-14 year olds

1-4 year olds

15-19 year olds

5-9 year olds

20-24 year olds

SELECTED HEALTHY PEOPLE 2000 OBJECTIVES: DISTRICT IX

| Chapter 7. Violent and Abusive Behavior | 1987 Baseline | Revised Baseline | Revised Target | Local Current Rate |
|--|---------------|------------------|----------------|-------------------------------|
| 7.1a Homicide rate for children under 4 years | 3.9 | 3.9 | 3.1 | 5.6 Rate includes 4-year olds |
| 7.2a Suicide rate for youths aged 15-19 | 10.3 | 10.3 | 8.2 | 10.6 |
| Chapter 9. Unintentional Injury | | | | |
| 9.3a Motor vehicle fatalities children aged 14 and young | 6.2 | 6.2 | 4.4 | 8.3 |
| 9.3b Motor vehicle fatalities youth aged 15 -24 | 36.9 | 36.9 | 26.8 | 41.0 |
| 9.5a Drowning fatalities children aged 4 and younger | 4.2 | 4.3 | 2.3 | 5.0 |
| 9.6a Residential fire deaths children aged 4 and younger | 4.4 | 4.5 | 3.3 | 3.1 |

* The Public Health Service began the process of establishing national baseline and target rates in 1987 and published them in 1990 as *Healthy People 2000*. Revisions to the baseline and target rates were published in 1995. A complete list of *Healthy People 2000* Injury Objectives with revisions is available from the Children's Safety Network Injury Data Technical

APPENDICES

A. Methodology

B. E-Code Categories

Appendix A

Methodology

Data Source

The source of the injury data contained in this publication was the vital statistics death records for Mississippi. The data was compiled using the *Fatal Injury Matrix* developed by the Children's Safety Network Injury Data Technical Assistance Center. For more information on the *Fatal Injury Matrix*, please contact the Children's Safety Network Injury Data Technical Assistance Center at (619) 594-3691. Population figures for Mississippi were obtained from the US Bureau of the Census (Estimates of the Population of Counties by Age, Sex, Race and Hispanic Origin: 1990 to 1997). Rates are presented for comparisons between districts.

The *Fatal Injury Matrix* calculates mortality rates for each age group by type of injury. However, it is important to note that the National Center for Health Statistics (NCHS) considers rates based on 20 or fewer deaths to be statistically unreliable and to be regarded with caution. For more information, see *Advance Report of Final Mortality Statistics*, 1990 (Vol. 41, No. 7, Supplement: January 7, 1993). A copy of this report can be obtained by calling (301) 436-8500. Five years of data were combined in an attempt to address the issue of small numbers.

Race and Ethnicity

Mississippi considers Hispanic to be an ethnicity rather than a race. Data listed in the Hispanic categories is also contained in the other racial categories and thus is labeled DUPLICATE on the matrix sheets.

Injury Definitions

The E-Code listing in Appendix B was used to define injury types. Data on alcohol involvement in motor vehicle injuries was not available. This information is also contained in the homicide and suicide total categories and thus is labeled DUPLICATE on the Matrix sheets.

Social and Economic Costs of Injury

Years Potential Life Lost figures were based on the Life Expectancy Tables published by the US Bureau of the Census. Cost estimates were based on the national cost of injury figures developed by Dr. Ted Miller at the Children's Safety Network Economics and Insurance Resource Center. The cost figures were computed from 1990 and 1991 estimates from the US Bureau of the Census and the Bureau of Labor Statistics using the equation in Rice, MacKenzie and Associates, *Cost of Injury in the United States - A Report to Congress 1989*. Lifetime Productivity Loss included the loss of wages, fringe benefits and household production calculated in 1991 at a 2.5% discount rate. Calculations of the Medical, Legal and Administrative Costs per Injury assumed that only people aged 20-74 had life insurance. Both Cost Estimates and Lifetime Productivity Loss were adjusted using Mississippi-specific multipliers.

Healthy People 2000 Objectives

The Healthy People 2000 Objectives included in the data sheets were those unintentional and intentional injury objectives that could be calculated from the information contained in the Matrix sheets. For a complete list of the unintentional and intentional injury objectives, please contact Mississippi State Department of Health, Surveillance Branch at (601) 576-7411.

Appendix B

E-Code Categories

| Unintentional Injuries | |
|--|---|
| Motor Vehicle - TOTAL E810.0–E825.0 DUPLICATE FIELD | All Collision and non–collision traffic and non–traffic injuries. <i>Note: This category totals the data in the other Motor Vehicle injury categories and a portion of the data in the Other Transport Category. The Fatal Matrix will not include data in this category in the summary of Total Unintentional Injuries or the grand total of all injuries calculated by the Fatal Matrix</i> |
| Motor Vehicle – Occupant E810.0 E810.1 E811.0 E811.1 E812.0 E812.1 E813.0 E813.1 E814.0 E814.1 E815.0 E815.1 E816.0 E816.1 E817.0 E817.1 E818.0 E818.1 E819.0 E819.1 E822.0 E822.1 E823.0 E823.1 E824.0 E824.1 E825.0 E825.1 | Collision and non–collision traffic and non–traffic injuries involving the operator or passenger of a car, bus, truck, van or construction machinery in transport under its own power or an off road motor vehicle operating on a public highway <i>Excludes the occupant or passenger of a bicycle, motorcycle, off road vehicle not operating on a highway, motorized bicycle or scooter and pedestrians</i> |
| Motor Vehicle – Motorcycle E810.2 E810.3 E811.2 E811.3 E812.2 E812.3 E813.2 E813.3 E814.2 E814.3 E815.2 E815.3 E816.2 E816.3 E817.2 E817.3 E818.2 E818.3 E819.2 E819.3 E822.2 E822.3 E823.2 E823.3 E824.2 E824.3 E825.2 E825.3 | Collision and non–collision traffic and non–traffic injuries involving the operator or passenger of a motorcycle, motorized bicycle (moped, scooter or tricycle), or motorcycle sidecar |
| Motor Vehicle – Pedal Cycle E810.6 E811.6 E812.6 E813.6 E814.6 E815.6 E816.6 E817.6 E818.6 E819.6 E822.6 E823.6 E824.6 E825.6 | Collision and non–collision traffic and non–traffic injuries involving a motor vehicle and a person riding on a vehicle operated solely by pedals including a bicycle, pedal cycle or tricycle <i>Excludes motorized bicycle (moped or scooter)</i> |
| Motor Vehicle – Pedestrian E810.7 E811.7 E812.7 E813.7 E814.7 E815.7 E816.7 E817.7 E818.7 E819.7 E822.7 E823.7 E824.7 E825.7 | Collision and non–collision traffic and non–traffic injuries involving a motor vehicle and a pedestrian or person changing a tire, on a roller or ice skates, skateboard, skis, sled or in a baby carriage, pushcart, sled or wheelchair |

| | |
|---|--|
| Motor Vehicle – Off Road E820.0–E821.9 | Non–traffic injuries involving an off road vehicle, a motor driven snowmobile or an all terrain vehicle (ATV) <i>Excludes accidents occurring on a public highway</i> |
| Motor Vehicle – Other | This category has been left undefined. Since use of different types of motor vehicles vary greatly in different parts of the country, this field has been provided for customized use. <i>Note: any data entered into this field will be calculated into all totals and rates by the Fatal Matrix. It is imperative that the data entered into this category be removed from one or more of the other motor vehicle categories.</i> |
| Motor Vehicle – Alcohol Involved DUPLICATE FIELD | Information on alcohol involvement is not contained within E –code structure. This information may be obtained from other sources and the Fatal Matrix will calculate a total and rate for this category. <i>Note: The Fatal Matrix will not include data in this category in the summary of Total Unintentional Injuries or the grand total of all injuries calculated by the Fatal Matrix.</i> |
| Pedal Cycle E826.0–E826.9 | Collision and non–collision injuries involving a vehicle operated solely by pedals including a bicycle, pedal cycle or tricycle <i>Excludes collision with other road vehicles including railroad train or motor vehicle</i> |

| | |
|---|--|
| <p>Other Transport E800.0–E807.9 E810.4 E810.5 E810.8 E810.9 E811.4 E811.5 E811.8 E811.9 E812.4 E812.5 E812.8 E812.9 E813.4 E813.5 E813.8 E813.9 E814.4 E814.5 E814.8 E814.9 E815.4 E815.5 E815.8 E815.9 E816.4 E816.5 E816.8 E816.9 E817.4 E817.5 E817.8 E817.9 E818.4 E818.5 E818.8 E818.9 E819.4 E819.5 E819.8 E819.9 E822.4 E822.5 E822.8 E822.9 E823.4 E823.5 E823.8 E823.9 E824.4 E824.5 E824.8 E824.9 E825.4 E825.5 E825.8 E825.9 E827.0–E829.9 E831.0–E831.9 E833.0–E838.9 E840.0–E845.9 E846–E848</p> | <p>All other and unspecified transport injuries including railway trains, streetcars, trams, trolleys, rider of an animal, animal drawn vehicle, water transportation accidents and air and space transport injuries</p> |
| <p>Drowning/Submersion E830.0–E830.9 E832.0–E832.9 E910.0–E910.9</p> | <p>Unintentional drowning/ submersion involving water sports (swimming, scuba or skin diving, surfboarding, water-skiing, ice skating, playing or wading in water), non-recreational water activities (marine salvage, underwater construction), accident to water craft, unintentional fall into water and drowning/ submersions in bathtubs or swimming pools</p> <p><i>Excludes diving accident resulting in injury other than drowning, injury due to jumping or diving into a swimming pool and drowning due to cataclysm</i></p> |
| <p>Fire and Flames E890.0–E899</p> | <p>Injuries caused by fire and flames, asphyxia or poisoning due to smoke or fumes caused by fire, burning by fire or ignition of clothing or bedclothes, fall or jump from a burning structure and secondary fires resulting from explosions</p> <p><i>Excludes arson, fire in or on operating machinery or moving transport vehicle</i></p> |
| <p>Scalds/Hot Objects E924.0–E924.9</p> | <p>Injuries caused by hot objects, substances, liquids, vapors, steam or acid burns.</p> <p><i>Excludes fire caused by the substances or objects and chemical burns resulting from swallowing a corrosive substance.</i></p> |

| | |
|---|--|
| Unintentional Firearm E922.0–E922.9 | <p>Accident caused by handgun, shotgun, hunting rifle, military firearms, flares and unspecified gunshot wound</p> <p><i>Excludes intentional firearm injuries and air rifle or BB guns</i></p> |
| Poisoning E850.0–E869.9 | <p>Unintentional poisonings by drugs, medicinals and biological substances, including drug overdose, wrong drug given or taken, poisoning by alcohol, cleansing agents, paints, solvents, pesticides, poisonous plants, heavy metals, gasoline and carbon monoxide</p> <p><i>Excludes administration with suicidal or homicidal intent and adverse reaction to correct drug properly administered</i></p> |
| Falls E880.0–E886.9 E887 E888 | <p>Includes falls on the same level (slipping, tripping, collision with object or person), falls from one level to another (stairs, bed, ladder, tree), diving or jumping into a swimming pool, tackles in sports, unspecified fall and fracture of unspecified cause</p> <p><i>Excludes falls from machinery, transport vehicles and bicycles, falls from horses in sport or transport, falls in or from a burning building, falls into water with submersion or drowning or falls onto edged, pointed or sharp objects</i></p> |
| Suffocation E911–E913.9 | <p>Inhalation and ingestion of food or other object causing obstruction of respiratory passages, unintentional mechanical suffocation, accidental hanging, smothering or choking</p> <p><i>Excludes intentional suffocation and ingestion of food or foreign object without mention of asphyxia or obstruction of respiratory passage</i></p> |
| Foreign Body E914–E915 | <p>Foreign body accidentally entering eye or other orifice</p> <p><i>Excludes corrosive liquid and foreign body causing asphyxiation</i></p> |

| | |
|--|---|
| Other Unintentional Environmental E900.0–E909; Struck by object E916–E918; Machinery in operation E919.0–E919.9; Cutting/ piercing E920.0–E920.9; Explosive E921.0–E921.9 E923.0–E923.9; Electricity E925.0–E925.9; Overexertion E927; Other E926.0–E926.9 E928.0–E928.9 | Injuries due to excessive heat or cold, lightning, cataclysmic storms, floods and earthquake, hunger, thirst, exposure, animal bites, being struck by object, caught in or between object, colliding with person or object (including hit by ball in sports), crushed by crowd, accidents caused by machinery, cutting and piercing instruments or objects, power tools, explosive material (fireworks, dynamite, torpedo), caustic or corrosive materials, electric current, exposure to radiation, overexertion and strenuous movement, other and unspecified environmental and accidental causes <i>Excludes fire caused by lightning, transport accident occurring after a storm, accidents caused by machinery not in operation, machinery in transport on highway under own power and injuries undetermined if accidentally or purposely inflicted</i> |
| Intentional Injuries | |
| Homicide E960.0–E968.9 | Injuries inflicted by another person with the intent to injure, harm or kill including child battering and rape <i>Excludes injuries due to legal intervention and war</i> |
| Homicide by Firearm E965.0–E965.4 DUPLICATE FIELD | Assault by handgun, shotgun, hunting rifle, military firearms and other and unspecified firearms |
| Suicide E950.0–E958.9 | Suicide, attempted suicide and intentionally self–inflicted injuries |
| Suicide by Firearm E955.0–E955.4 DUPLICATE FIELD | Suicide by handgun, shotgun, hunting rifle, military firearm and other and unspecified firearms. |

| | |
|---|---|
| Other Intentional Injury | <p>This category has been left undefined for customized use.</p> <p><i>Note: Any data entered into this field will be calculated into all totals and rates by the Fatal Matrix. It is imperative that the data entered into this category be removed from one or more of the other intentional injury categories.</i></p> |
| Other Injuries | |
| Undetermined Intent E980.0–E988.9 | <p>Injuries that cannot be determined whether the injury was accidental, suicidal or homicidal</p> <p><i>Excludes poisonings not specified as accidental or intentional</i></p> |
| Medical Injury E870.0–E876.9 E878–E879 E930.0–E949 | <p>Adverse effects with therapeutic use of drugs and biological substances including correct drug properly administered, misadventures to patients during surgical and medical care, and medical procedures as the cause of abnormal reaction or later complication, without mention of misadventure at the time of the procedure</p> <p><i>Excludes accidental overdose of drug and wrong drug given in error</i></p> |
| Other Injury Late effects E929.0–E929.9 E959 E969 E977 E989 E999 Legal interventions E970–E976 E978 Wars E990–998 | <p>Late effects of unintentional injuries, assaults, suicide attempts, legal intervention and war; injuries inflicted by law enforcement agents on duty, legal executions, injuries to military personnel and civilians caused by war and occurring during the time of war and insurrection</p> <p><i>Excludes late effects of surgical and medical procedures and therapeutic use of drugs and medicines, injuries caused by civil insurrections, injuries which occur during training of military personnel and manufacture of war material</i></p> |
